Sixing Hu

Curriculum Vitae

School of Management and Economics
The Chinese University of Hong Kong, Shenzhen

husixing@cuhk.edu.cn
University Profile

ACADEMIC POSITIONS

The Chinese University of Hong Kong, Shenzhen — Dec 2025 – Present
Postdoctoral Fellow in Applied Economics
School of Management and Economics

EDUCATION

National University of Singapore — Aug 2021 – Nov 2025
Ph.D. in Operations Research and Analytics — Singapore
Supervisor: Yifan Feng Co-supervisor: Jussi Keppo

Harbin Institute of Technology — Aug 2017 – Jun 2021
B.S. in Information Management and Information System — Harbin, China

University of California, Berkeley — Aug 2019 – May 2020
Academic Exchange Program — Berkeley, USA

RESEARCH INTERESTS

Platform Operations, Service Quality and Information Design, Empirical Operations Management

WORKING PAPERS

1. **Revisiting Gig Labor Supply Curves: Evidence from a Logistics Platform** [SSRN]
   with Yifan Feng and Jussi Keppo
   Under review at MSOM
   Quasi-experimental evidence shows that higher compensation increases total labor supply by attracting more workers, despite reducing deliveries per active worker.

2. **Vehicle Relocation with Location-Based Compensation**
   with Bomin Bian, Zhenyu Hu, and Long He
   Under review at MSOM
   An equilibrium model derives optimal location-based relocation incentives under uncertain demand and driver competition, showing when decentralized compensation can achieve profits close to centralized allocation.

3. **How Selective Should a Quality Certification Be? Evidence from a Ride-Hailing Field Experiment**
   with Yunan Ji, Qiuping Yu, and Yiming Zhang
   Complete draft
   A large-scale field experiment shows that broader certification reduces cancellations and improves passenger evaluations, challenging the view that quality badges must remain scarce.

4. **Balancing Positive and Negative Feedback in Quality Certification**
   with Yunan Ji, Qiuping Yu, and Yiming Zhang
   Complete draft
   Examines how the weighting of positive and negative passenger feedback shapes certification eligibility and the exclusion of otherwise well-reviewed drivers.

5. **Pricing a Vertically Tiered Menu: Which Price Moves the Market? Evidence from a Ride-Hailing Field Experiment**
   with Yunan Ji, Qiuping Yu, and Yiming Zhang
   Complete draft
   A field experiment shows that standard-tier discounts expand market participation, while premium-tier discounts shift demand between tiers, revealing different roles for prices within a service menu.

RESEARCH IN PROGRESS

Driver Service Quality and Customer Lifetime Value (LTV) Apr 2026 – Present

Academic–industry research collaboration with DiDi

- Study how driver service quality relates to subsequent passenger spending to inform customer lifetime value analysis and prioritize service-quality interventions.
- Implement high-dimensional driver–passenger two-way fixed-effects models using connected estimation samples, accounting for passenger heterogeneity, lifecycle patterns, and trip context.
- Evaluate driver rankings using pre-ride spending placebos, cross-period stability, out-of-sample tests, and independent service-quality measures.

INDUSTRY EXPERIENCE

DiDi Research Collaborator Apr 2026 – Present

- Collaborate with DiDi's research and business teams on service-quality certification and pricing field experiments. Communicate empirical findings to inform product and operational decisions.

Digital Zhejiang Data Analyst Oct 2020 – Jan 2021

Hangzhou, China

- Conducted data analysis using HiveQL and Alibaba Cloud to automate dashboards.

TEACHING EXPERIENCE

National University of Singapore

Teaching Assistant, DBA3713 Analytics for Risk Management Aug 2023 – Dec 2023

Instructor: Prof. Yifan Feng

Teaching Assistant, DAO2702 Programming for Business Analytics Aug 2022 – Dec 2022

Instructor: Prof. Peng Xiong. Led weekly tutorials for 90 undergraduate students.

HONORS AND AWARDS

Best Student Paper Award, Analytics for X Dec 2023
National University of Singapore Research Scholarship 2021–2025
First-Class Scholarship, Harbin Institute of Technology Sep 2019
First Prize, 9th National College Students E-Commerce Competition May 2019

CONFERENCE PRESENTATIONS

INFORMS Annual Meeting, San Francisco, USA Nov 2026

Presented *How Selective Should a Quality Certification Be?*

CSAMSE, Shenyang, China Jun 2026
INFORMS International Meeting, Singapore Jul 2025
INFORMS Annual Meeting, Seattle, USA Oct 2024
CSAMSE, Xiamen, China Jul 2024
MSOM Conference, Minneapolis, USA Jun 2024
POMS-HK International Conference, Hong Kong Jan 2024
Analytics for X, Chongqing, China Dec 2023

METHODS, COMPUTING, AND LANGUAGES

Computing Python (pandas, NumPy), R, SQL/HiveQL, Spark/PySpark, Java, LaTeX

Methods Field experiments, two-way fixed effects, difference-in-differences, causal forests

Languages Chinese (native), English (proficient)
